JL: If as I hope despite weariness I hope only temporarily the calls have weakened and I've filled what "ll clipped from today's Post, I'm taking a break to hear if Zodiacdo DC subscriber, WGAB, Georgetown U., will carry the item (with today's block and NO news I doubt it), while sitting and doing nothing it suddenly occurred to me that if we use a quantitative rather than a qualitative measure, I've never had so many calls in a single day. The stations' audiences may be and probably are small, but the percentage of Zodiac's subscribers who phoned has to be large. My point is that as a measurement of youth and minority interest this says there is much. Each station had an item twice the usual maximum size and could have been content with it. Jon wrote that he had heard it used on two SFrancisco stations. One used me on tape today, taped Friday night here...I do think that while we may never translate this into $$$ it is a dependable measurement of popular interest in the subject(s). My mail for more than a years confirms this. Heavier than since Garrison raised his ~~dirty~~ head. Remember, I've initiated no single call. That so many wanted more than the item is, I think, meaningful. WGAB did read copy at 8:15. It had no address. I'll ask Jon to include the "where" in the next load! If
